

INTRODUCING REVOLUTIONARY 3D RADAR ON-THE-GO SMART SECURITY ALERT DEVICE

Consider This Technology announces its new product LarryAlert

Ventura, October 13, 2015 - Connected security devices are no longer just for the home or office. We are active people; Cyclists, Campers, RVers, Motorcyclists, DIY'ers, Surfers, Contractors, who need a way to keep an eye on our tools, toys, and equipment while we work and play. Gear is too expensive to leave unattended, so who gets left behind watching all the stuff when you want to step away to enjoy the sunset, or worse when you're alone and must grab some ice in the store? Not to worry, Larry's got your back!

Introducing LarryAlert, the first pocket-sized connected smart alert device of its kind, designed with adventure in mind! The revolutionary 3D radar motion sensor creates a size controlled virtual boundary that keeps an eye on your stuff while in crowded areas or open public spaces. People can move around your truck, boat trailer, campsite, office counter or next to your RV - no problem. As soon as anyone enters your radar protected area, an instant alert along with a photo burst of captured images is sent to your smartphone via state of the art long range WiFi. The manual photo feature allows anytime photo check on the area around your stuff. Smartphone App set-up options allow for silent or siren mode and a built-in real time streaming loudspeaker to greet friends or tell an intruder "hands off my stuff"! Now you can take your stuff with you without your stuff being taken from you.

No SIM card required. No monthly fees. Larry is designed as a rugged weather resistant take-anywhere device. Powered by exclusive 3D Radar sensing technology, the latest in embedded WiFi technology, and a LiPo rechargeable battery. Featuring a unique repositionable backing, adjustable velcro strap, a lock-down cable, SD card, charger adapter and micro USB cable. Larry is simply the most unique portable security device ever created. Get outside and enjoy your activities with peace of mind.
